

GROUSER BARS

Save time and fuel by improving traction
Quality heavy duty grouser retread bars

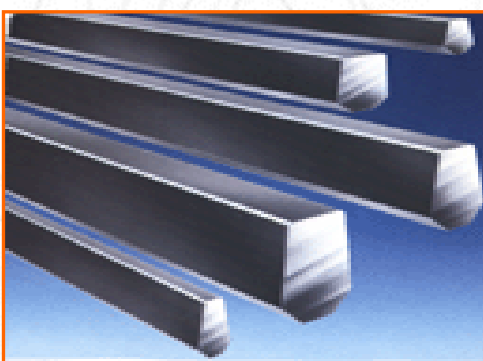

Wear profiles to suit your needs

- Hot-rolled profiles are made of wear resistant alloy steel hardened to approximately 500 Brinell
- The material has good welding properties
- Wear profiles suitable for different types of repair work
- The profiles are provided with a welding bevel
- Length approximately 3000 mm.

Be more productive

When a dozer is working with worn out grouser bars on its trackshoes, traction is lost, resulting in loss of time and fuel.

You can restore your dozer to its original yield by replacing your grouser bars.

Designed & manufactured to perform

- High toughness and resistance to abrasion
- Straightened with special equipment, thus assuring excellent working and use conditions
- Conveniently packed, making handling easier
- Laboratory tests assure the quality of the steel
- Special lengths and/or hardness available on request
- Special design and shape assures a prompt and economic welding process with a perfect finish.

Save money with quality Cutting Edges manufactured grouser bars
Heat treated, through hardened, quenched & tempered alloy steel

QUALITY EQUIPMENT PARTS

Reduce your operating costs
from Australia's largest supplier of aftermarket parts

Ground Engaging Tools

A comprehensive range of edges & end bits, teeth and adaptors, lip shrouds, ripper boots and tynes to suit all makes and models of loaders, excavators, dozers and general earthmoving, mining and construction machines.

Crusher Wear Parts

A wide range of quality crusher wear parts to suit most machines. Castings are manufactured in a variety of materials including manganese steel, alloy steel and ductile iron.

Wearplate

Wear resistant products including wear plate, Tungsten Longlife Coating and white iron block & bar. Our CC1500 wearplate will outlast quenched and tempered steels by up to 12 times and white irons by up to 4 times.

Mining Products

Products for the mining industry include wearplate, apron feeder pans, Cutting Edges' patented ground engaging tools locking system incorporating Dynalock, R-Lock and Dynaclamp, and track shoes for a variety of machines.

Engine Parts

Quality engine parts for most brands of machinery and trucks, including rebuild kits, crankshafts, camshafts, compressors, and water pump kits. Professional service, competitive prices and off the shelf availability.

Machine Parts

Quality replacement parts to suit most machines including pins & bushes, hydraulic seals & pumps, brake components, oil & water pumps, fuel pumps and power train components. Comprehensive warranty on all parts.
