

MINING PRODUCTS

Reduce costs, increase productivity and improve safety
Cutting Edges' patented hammerless GET locking systems

Dynalock

Simple installation and removal of teeth

The patented Dynalock attachment system makes it simple to install and remove teeth on draglines, shovels and large hydraulic excavators.

It transforms a difficult and time consuming maintenance project into a simple on-site task.

Teeth can be installed and removed using only a pneumatic or manual socket wrench. There is no need for hammers or heat.

Dynalock is a breakthrough in the important issues of productivity, safety and cost reduction.

Dynaclamp

Easier, faster, safer

The patented Dynaclamp system makes the installation and removal of Whisler adaptors on large shovels easier, faster and safer.

Reduce downtime

The unique and simple mechanical design of the Dynaclamp effectively locates and clamps WH10 and WH12 adaptors without the need for heat or hammers, keeping downtime to a minimum.

Improved safety

Importantly, safety is improved.

R-Lock

Improve safety and reduce downtime

R-Lock is a unique mechanical locking device that secures teeth, lip shrouds and wing shrouds on hydraulic excavators and face shovels. It makes fitting and removal simple and quick.

Improve bucket fill and cycle times

The slim profile design of the R-Lock system improves the efficiency of bucket penetration and so improves bucket fill and cycle times. At the same time it maximizes the lip and wing protection with fully covered leading edge shrouding.

QUALITY EQUIPMENT PARTS

Reduce your operating costs
from Australia's largest supplier of aftermarket parts

Ground Engaging Tools

A comprehensive range of edges & end bits, teeth and adaptors, lip shrouds, ripper boots and tynes to suit all makes and models of loaders, excavators, dozers and general earthmoving, mining and construction machines.

Crusher Wear Parts

A wide range of quality crusher wear parts to suit most machines. Castings are manufactured in a variety of materials including manganese steel, alloy steel and ductile iron.

Wearplate

Wear resistant products including wear plate, Tungsten Longlife Coating and white iron block & bar. Our CC1500 wearplate will outlast quenched and tempered steels by up to 12 times and white irons by up to 4 times.

Mining Products

Products for the mining industry include wearplate, apron feeder pans, Cutting Edges' patented ground engaging tools locking system incorporating Dynalock, R-Lock and Dynaclamp, and track shoes for a variety of machines.

Engine Parts

Quality engine parts for most brands of machinery and trucks, including rebuild kits, crankshafts, camshafts, compressors, and water pump kits. Professional service, competitive prices and off the shelf availability.

Machine Parts

Quality replacement parts to suit most machines including pins & bushes, hydraulic seals & pumps, brake components, oil & water pumps, fuel pumps and power train components. Comprehensive warranty on all parts.
