

Wear Plate and Wear Protection

Reduce your operating costs with CC1500 wearplate

Designed, manufactured and tested for longer life and greater savings

CC 1500 is a duplex material consisting of a very tough and highly wear resistant alloy overlaid onto a shock absorbing mild steel or chromium steel backing plate.

These properties render this product suitable for use under extreme operating conditions where the cost of downtime far outweighs the initial expenditure or the capital outlay of replacement.

Will outlast other wearplates by 4 to 12 times

CC1500 Wearplate will outlast quenched and tempered steels by up to 12 times and white iron up to 4 times.

Substantial weight savings

Where handling or weight factor are a consideration **CC1500 Wearplate** offers substantial weight savings for the same wearlife as heat treated alloy steels or white irons. This provides increased wearlife for the same weight.

Maintains the efficiency of equipment

CC1500 Wearplate maintains the efficiency of chutes, bins, hoppers, buckets and other material handling equipment because it is quickly polished by abrading materials. This produces a surface with a low coefficient of friction, which discourages hang-ups.

The cost benefits far outweigh the initial expenditure or the capital outlay of replacement

QUALITY EQUIPMENT PARTS

Reduce your operating costs
from Australia's largest supplier of aftermarket parts

Ground Engaging Tools

A comprehensive range of edges & end bits, teeth and adaptors, lip shrouds, ripper boots and tynes to suit all makes and models of loaders, excavators, dozers and general earthmoving, mining and construction machines.

Crusher Wear Parts

A wide range of quality crusher wear parts to suit most machines. Castings are manufactured in a variety of materials including manganese steel, alloy steel and ductile iron.

Wearplate

Wear resistant products including wear plate, Tungsten Longlife Coating and white iron block & bar. Our CC1500 wearplate will outlast quenched and tempered steels by up to 12 times and white irons by up to 4 times.

Mining Products

Products for the mining industry include wearplate, apron feeder pans, Cutting Edges' patented ground engaging tools locking system incorporating Dynalock, R-Lock and Dynaclamp, and track shoes for a variety of machines.

Engine Parts

Quality engine parts for most brands of machinery and trucks, including rebuild kits, crankshafts, camshafts, compressors, and water pump kits. Professional service, competitive prices and off the shelf availability.

Machine Parts

Quality replacement parts to suit most machines including pins & bushes, hydraulic seals & pumps, brake components, oil & water pumps, fuel pumps and power train components. Comprehensive warranty on all parts.
